

CHRISTUS Santa Rosa Health System Campuses to Become Tobacco-Free

For the health and safety of all, CHRISTUS Santa Rosa Health System will become tobacco-free on November 19, 2009, coinciding with the American Cancer Society's Great American Smoke-out. Our new tobacco-free policy will ensure a safe and healthy environment for patients, visitors, volunteers, physicians and Associates who visit CHRISTUS Santa Rosa facilities.

This new tobacco-free policy means Associates, visitors, patients and physicians will not be allowed to use tobacco products anywhere in or on CHRISTUS Santa Rosa owned or leased properties including parking structures, parking lots and outdoor areas.

CHRISTUS Santa Rosa, one of America's 50 Best Hospitals, earning the HealthGrades Distinguished Hospital award for six straight years, believes that wellness and health promotion are important to our mission and vision as a health care leader.
